PIRNAR

Welcome Home

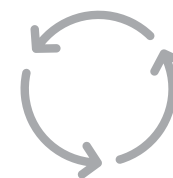

The most beautiful moments in our lives take place on our very own doorsteps. What could be better than the feeling of returning into the arms of our loved ones after a busy day? We are brimming with pride for all that we have created. The luxurious comfort of modern living lived in the most beautiful of colours. Superior thermal and acoustic insulation for warmth and peace of mind. Intelligent lighting giving that magical look to your home. An entrance with greater security and sophistication. All this with the Pirnar Optimum series.

INNOVATIVE

SMART ENTRANCE

PIRNAR SECUROSMART

FRIENDLY

Enjoy the Comforts of Modern Living

Modern living is characterised by the use of smart technologies and modern solutions. This also applies to the development of front doors. At Pirnar, we have brought a range of innovations to the front door that will turn your home into an oasis of peace, cosiness and warmth. Never before has this class of front doors seen so many effective improvements and such superior features. Upgrades in thermal and acoustic insulation combined with a smart unlocking system and smart lighting perfectly complement the most established smart home solutions.

A Smart Home Starts With a Smart Door

A smart home starts at the front door. Now you can control your door wherever you are. In addition to unlocking your door remotely, the SecuroSmart mobile app allows you to control entry, monitor activity, create an entry log and enter your fingerprint in an emergency, even for several of your properties at the same time. It is compatible with many popular smart home solutions.

Voice control with Google Assistant and Amazon Alexa

Use on Apple Watch

Control with Siri – Apple's personal assistant

Linked to Pinar's SmartLux smart lighting system

SmartLux Smart Lighting

When the sun goes down and the first stars appear in the night sky, Pirnar's entrance comes to life. The beauty of the night light, already enhanced at the entrance with Lux lighting, is now complemented with SmartLux smart lighting. It provides both manual and remote control of the illumination of the front door's thresholds, bar handles and decorative trim.

The manual control mode is built into the door frame and allows manual changes of the intensity and colour of the light.

Remote control via the SecuroSmart mobile app allows you to change the temperature, intensity and colour of the light and to control and set the timer.

Light timer control

Wi-Fi and Bluetooth connectivity

Remote control

Voice control with Google Assistant and Amazon Alexa integration

Light temperature control from 2700 kelvin (warm white) to 6500 kelvin (cool white)

CarbonCore

The world's Strongest Carbon Fibre Front Door Construction

Construction is at the heart of every top-quality front door. CarbonCore is the world's only patented carbon construction developed exclusively for front doors. Carbon fibre is extremely light, rigid and several times stronger than steel, so the door will not warp in the scorching sun or the coldest winters. CarbonCore allows for easier installation without warping, reduces delivery and installation defects, lessens the environmental impact and shortens the production and sales process.

4

Ready to fight the wind, water and cold?

Advanced Magnet WeatherSeal system

The advanced Magnet WeatherSeal system is an innovation that has earned the door an outstanding 9A watertight rating in the testing laboratories by maintaining perfect watertightness at 600 Pa, equivalent to a wind speed of 114 km/h. This is six times the pressure that a conventional front door can withstand.

Superior additional thermal insulation

Combined with additional thermal insulation, CarbonCore creates an energy-efficient front door that achieves an outstanding thermal transmittance value of 0.71 W (m²K).

Welcome to
PIRNAR's
digital world

* Additional insulation in the structure (surcharge).

SoundCore

Sound Insulation for more Peace and better Comfort for Residential Houses

SoundCore is a front door for residential houses with a 900 kg/m^3 density filler, which combined with a superior seal and door leaf, reduces the sound load in living spaces more than 18 fold compared to an open door. Compared to standard front doors, the intensity of sound passing through the door is significantly reduced.

Acoustic insulation panel: **SoundCore**

Soundproofing: **$R_w (C; C_{tr}) = \text{to } 43 (-1; -4) \text{ dB}$**

Thermal transmittance: **$U_d = \text{from } 0,84 \text{ W/(m}^2\text{K)}$**

R_w = sound insulation

C = correction factor for the midrange frequency

C_{tr} = correction factor for the low frequency range

Bar handles to make an entrance with

Handles are the most personal part of the door. Every resident touches it at least a thousand times a year, which is why PIRNAR pays special attention to them. We select one of the basic forms, either round or angular, and determine the exact length choosing from 750 mm, 950 mm, 1150 mm, 1350 mm, 1500 mm, 1700 mm or 1800 mm. To ensure the best impression and a personal touch, we have created several series of unique illumination upgrades of handles that use patented technology and that were awarded the prestigious international German Design Award Special 2019.
